CORE STACK

HTML, CSS, JavaScript

React, Angular, Vue

TypeScript

REST, GraphQL

Performance, Accessibility

Cypress, Vitest

PROFILE

Frontend engineer who builds fast, accessible, and maintainable web applications with a strong focus on scalable architecture and seamless user experience across modern frameworks

PROJECTS

YC Directory

Sanity, Next.js, TailwindCSS, NextAuth

- A SaaS platform for posting and discovering startup ideas with Sanity CMS handling real-time content management and cached responses via Next.js PPR
- Google OAuth authentication with JWT session management via Auth.js and NextAuth
- Startup creation form with Zod schema validation and a dynamic markdown editor with live preview
- Dynamic profile pages with user data and authored startups fetched on demand

Aether UI

React, Three.js, GSAP

- A clone of the Apple iPhone 15 Pro showcase website.
- Scroll choreography and video orchestration using GSAP animations
- iPhone 15 Pro 3D model rendered using the Three.js library

DevPulse

React, Tanstack Query, Recharts

- A dashboard UI for visualization GitHub API metrics
- Data fetching fully configured using Tanstack Query and Axios
- Loading and error states handled using Suspense and Error boundaries.
- Data charts and visuals rendered using Recharts component library

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript

Frameworks: React, Angular, Vue

State Management: Redux, Zustand, NgRX, Pinia

APIs: REST, GraphQL

Optimization: Lazy loading, code splitting, performance tuning

Security: XSS, CSP, CORS

Testing: Cypress, Vitest
